Services for Treatment Centers

Crossroads' goal is to provide supportive medical and psychiatric care to those in recovery. With our experienced staff we support treatment centers in the St. Lucie, Martin and Palm Beach tri-county area.

Why invest in a full time clinician, if you can call Crossroads for just a few hours a week? We are always a phone call away. Our rates are reasonable (*recently we discovered we're not much more expensive than a carpenter*), and we offer terms and discounts for bulk purchases.

Perhaps your facility does not have the space or equipment—we can see your clients in our clinic in downtown Stuart.

Crossroads works with treatment centers' detox, PHP, IOP, and OP programs. Our clinic provides **continuation of medical, psychiatric and psychological care, medication management and counseling in an outpatient basis** to individuals no longer enrolled in a treatment program.

Crossroads understands the complexities of addiction. Your clients are cared by a staff of concerned medical personnel with years of experience. Our treatment plans are fluid, assessed continually, and modified as needed as part of the long term recovery process.

Crossroads recognizes that addiction is a treatable disease that can create numerous medical complications. Medical assessments, anti-craving medications, genetic drug compatibility testing are all offered.

Where do you send your clients after they have finished your program?

Many general practice clinics simply do not know how to deal with addiction medications or treatments.

Our clinic works only with individuals in addiction recovery.

Crossroads

Services for Individuals

We understand that one of the most difficult challenges about being in recovery *is to stay in recovery*. **Where do you go once you are no longer enrolled in a treatment facility?**

You will find that less than 1 in 100 of the doctors in the USA are trained in addiction recovery medicine¹, and that many clinics simply don't know how to treat you.

The staff at **Crossroads** are all specialized and personally involved in addiction medicine and recovery. **Our clinic aims to welcome you to your sober life.**

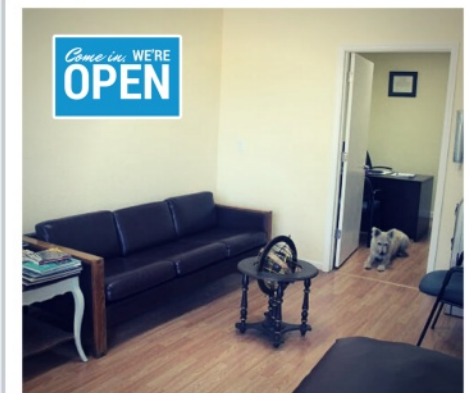

- ◆ Our **clinic only serves those in recovery**; in an intimate setting – you don't get lost in the crowd
- ◆ Go **online and book an appointment** right on our website, from your phone.
- ◆ Yes! **Evening hours**: Don't ask for time off at that new job
- ◆ **Most forms of insurance** – also cash and credit card options
- ◆ Medical care, psychiatric care, medication management, counseling

◆ Vivitrol™, anti-craving medications, toxicology screening, urinalysis, physicals, and pregnancy testing

◆ **Services all aimed at *staying in recovery***

**Come see us in the clinic
made just for you!!**
